

STELLA MARIS

BLUEBERRIES

Stella Maris® contains Acadian Plant Health™'s unique technology that helps crops to reach their full yield potential. It enhances crop quality and productivity by enhancing root growth, improving nutritional health and bolstering tolerance to challenging growing conditions.

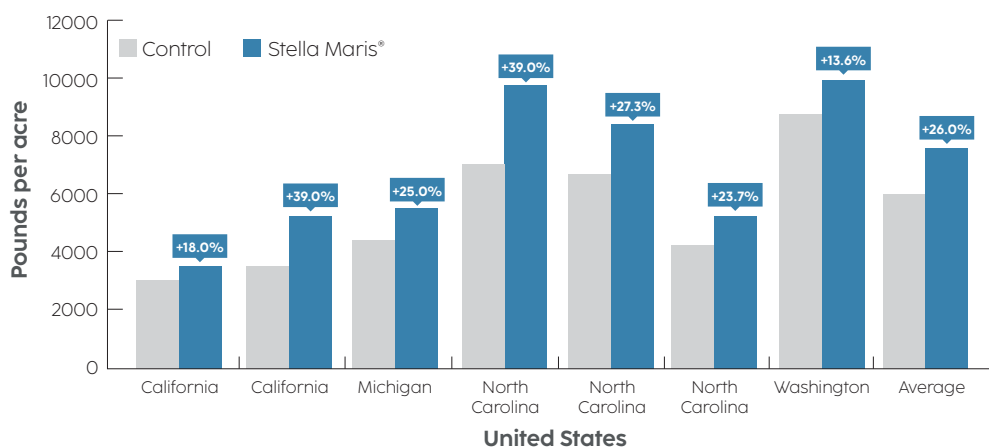

BENEFITS

- Enhances rooting
- Increases nutrient uptake
- Mitigates environmental stresses
- Improves overall yield

STELLA MARIS® IMPROVES YIELD AND QUALITY

Stella Maris® gives your crop strong early growth, good nutrition and the ability to tolerate even the most challenging growing conditions for your best yields ever! In addition, Stella Maris® works at a cellular level by improving the nutritional status of your crop, leading to large, firm fruit.

BLUEBERRY YIELD SUMMARY

Stella Maris® consistently improved yield of blueberries in multiple locations and conditions with an average yield increase of 1,553 pounds per acre or 26%.

HOW DOES STELLA MARIS® BENEFIT BLUEBERRIES?

IMPROVES NUTRITIONAL UPTAKE: Stella Maris® enhances your nutritional program by improving crops' nutrient uptake. When you apply Stella Maris® as part of your regular application program, you're putting nutrients on the fast track and ensuring your plants get the most out of every ounce of fertilizer. Strong growth throughout the season ensures large, quality fruit.

Stella Maris® contains natural complexing sugars which bind to micronutrients, thereby improving their bioavailability and translocation within the plant.

FOLIAR NUTRIENT LEVELS IN BLUEBERRY PLANTS

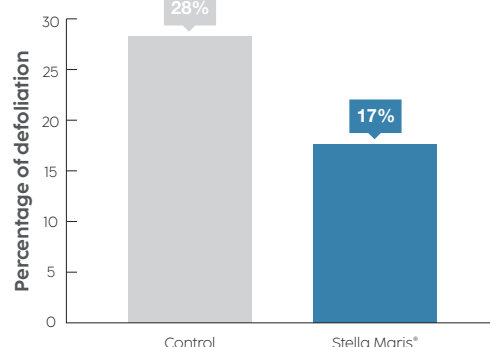

Stella Maris® improves uptake of key nutrients such as calcium, nitrogen and potassium.

MITIGATES ENVIRONMENTAL STRESSES:

Don't let stress ruin your fruit! Stress threatens crop quality. With its numerous bioactive compounds such as mannitol, unique polysaccharides and betaines, Stella Maris® improves a plant's tolerance to a variety of stressful growing conditions such as cold, excessive rain, heat, drought and salt. Plus, mid-season applications of Stella Maris® prime your plant to withstand difficult summer conditions that could reduce the number and quality of buds for next year. Stella Maris® improves your crop's tolerance to tough growing conditions, assuring better quality yields.

HEAT DEFOLIATION RATINGS

Stella Maris® helps your crop tolerate the toughest heat and drought of the summer, as evidenced by less defoliation in the treated plants.

IMPROVES OVERALL YIELD AND QUALITY:

Large, quality blueberries start from the ground up – Stella Maris® gives your crops the power to resist even the toughest environmental stresses and make the most of every fertilizer ounce you apply, leading to increased yield and high-quality fruit.

RATES AND TIMINGS

Apply Stella Maris® at 2.5 to 5 litres per hectare at planting or early spring growth; follow by treatments every 7-30 days. Applications can be either foliar or soil.

Additional applications can be made 3-5 days prior to an anticipated plant stress.

Stella Maris® mixes well with nutrients and other agricultural products.
